1. Overview of Operating Results

(1) Overview of Operating Results for the Current Quarter

The global economy during the cumulative third quarter of the consolidated fiscal year under review showed signs of recovery against the backdrop of interest rate cuts in the United States and Europe; however, the slowdown of the Chinese economy and ongoing geopolitical risks continued to exert downward pressure, resulting in only a moderate recovery overall.

In the semiconductor industry, demand related to AI and data centers continued to drive the market. Particularly in the memory sector, in addition to High Bandwidth Memory (HBM), tight supply-demand conditions and rising prices also progressed in conventional memory such as DRAM and NAND, and capital expenditures showed a recovery trend.

Under these circumstances, the performance of the Group during the cumulative third quarter of the consolidated fiscal year under review saw a decrease in net sales due to the combined impact of U.S. tariff policies and sluggish demand for automotive semiconductors. In addition, changes in the product mix occurred, resulting in a year-on-year decrease in both net sales and profit.

Meanwhile, with respect to orders, orders from China, Taiwan, and other Asian regions, mainly for AI and data center-related applications such as memory, remained strong. Orders received in the third quarter (October to December 2025) amounted to 19,620 million yen (quarter-on-quarter increase of 5,012 million yen, 34.3%), marking the second-highest quarterly level on record. Against this backdrop of demand trends, order backlog has also been steadily accumulating and is expected to contribute to future performance.

Operating Results for the third quarter consolidated cumulative period as follows.

Net sales	36,930 million yen (year-on-year decrease of 2,329 million yen, 5.9%)
Operating profit	3,685 million yen (year-on-year decrease of 2,836 million yen, 43.5%)
Ordinary profit	3,696 million yen (year-on-year decrease of 3,385 million yen, 47.8%)
Profit attributable to owners of parent	2,627 million yen (year-on-year decrease of 2,525 million yen, 49.0%)

Main factors of variation in operating profit for the third quarter consolidated cumulative period are as follows. (year-on-year comparison)

Impact due to Decrease in Net sales	1,084 million yen decrease
Impact due to Product Mix, etc.	934 million yen decrease
Impact due to Increase in Development Cost included in Manufacturing Cost, etc.	494 million yen decrease
Impact due to Increase in SG&A	324 million yen decrease

Operating Results by segment are as follows.

[Semiconductor Manufacturing Equipment Business]

Regarding operating results of the semiconductor manufacturing equipment business, in addition to increased net sales of singulation equipment mainly for memory applications, net sales of TSS (Total Solution Service) also increased, accompanying improvements in customers' utilization rates. On the other hand, due to delays and reviews of investments caused by the impact of U.S. tariff policies, as well as weak demand for automotive applications associated with the slowdown in growth of the EV market, net sales of molding equipment decreased, resulting in net sales of 33,940 million yen (year-on-year decrease of 2,182 million yen, 6.0%).

As for profit, due to the decrease in net sales and temporary fluctuations in the product mix, operating profit amounted to 3,425 million yen (year-on-year decrease of 2,777 million yen, 44.8%).

[Medical Device Business]

Regarding operating results of the medical device business, net sales amounted to 1,865 million yen (year-on-year increase of 134 million yen, 7.8%) due to steady demand for medical plastic molded products and assembled products. As for profit, operating profit amounted to 346 million yen (year-on-year decrease of 22 million yen, 6.1%) due to an increase in personnel expenses and other costs associated with business expansion.

[Laser Processing Machine business]

Regarding operating results of the laser processing machine business, due to the continued sluggish capital expenditures by customers for the main product, laser trimmer equipment, net sales amounted to 1,124 million yen (year-on-year decrease of 281 million yen, 20.0%), and operating loss amounted to 86 million yen (operating loss of 50 million yen in the same period last year).

(2) Overview of Financial Position for the Current Quarter

Total assets at the end of the third quarter of the consolidated fiscal year were 101,357million yen, an increase of 18,128 million yen compared to the end of the previous consolidated fiscal year. This was mainly due to an increase in current assets such as cash and deposits and inventories, as well as non-current assets.

Total liabilities were 33,847 million yen, an increase of 12,005 million yen compared to the end of the previous consolidated fiscal year. This was mainly due to an increase in borrowings and accounts payable - trade.

Net assets were 67,510 million yen, an increase of 6,123 million yen compared to the end of the previous consolidated fiscal year. This was due to an increase in foreign currency translation adjustment and valuation difference on available-for-sale securities.

As a result, the equity-to-asset ratio at the end of the third quarter of consolidated period was 66.6% (a decrease of 7.2 percentage points compared to the end of the previous consolidated fiscal year).

(3) Explanation on Forecast Information such as Consolidated Earnings Forecast

Due to the postponement of the initially expected timing of mass production investments and an increase in the proportion of orders for products with long lead times, such as evaluation equipment, the timing of revenue recognition has been delayed from the initial plan, and net sales are expected to come in below the previous forecast. In addition to the decrease in net sales, impacted by product mix fluctuations and additional costs associated with initial shipments, profit at each stage is also expected to come in below the previous forecast. Although net sales and profit at each stage are expected to be lower than the previous forecast, performance has been in a steady recovery trend since the second quarter of this fiscal year, and net sales are expected to reach a record high.

The current orders environment remains firm, mainly for AI and data center-related applications such as memory. Against this backdrop of demand trends, order backlog has also been steadily accumulating and is expected to contribute to future net sales. Furthermore, orders for compression equipment have been increasing recently, and based on this trend, improvements in the product mix are expected. In addition, the impact of additional costs associated with initial shipments, which are temporary factors, is expected to be mitigated, and profit is also expected to improve.

For further details, please refer to the "Notice Regarding Earnings Forecast Revision for the FY2025" disclosed today (February 6, 2026).
